I have the following tables in my database: comments 0cc13bf012

I am using TCS and notice another program is getting installed when I

connect to the modem. I can't seem to remove it. What is the program called and how can I remove it? Thank you. A: I think you mean the Windows Mobile Program. Check the "Program Files" folder for a folder named Motorola, and then the sub-folder named XDM (or some similar name). That'll be the folder where your program is installed. Also, check in the "Program Files (x86)" folder for a directory named Motorola. Some programs have the x86 version on the same drive as the x86 version, but this is unusual. If you have another Windows operating system, you might be able to find the folder on its hard drive. Downloads Uses There is no fixed number of times of use. Fresh shrimp can be dipped into the marinade for immediate cooking. Remaining marinade may be used for future use, such as for quick, crispy sautéed shrimp that can be heated in the oven in 5 minutes. I like to marinate the shrimp the night before and then pop them into the refrigerator. Just before grilling them, they can go right from refrigerator to grill. The marinade not only tenderizes the shrimp, but also gets a nice flavor rub on them and makes it easier to clean the grill after cooking. 1. Blanch shrimp in boiling water. 2. While shrimp is cooking, prepare marinade. 3. Remove shrimp from boiling water and soak in marinade while returning to heat of boiling water. Add shrimp to saucepan of boiling water and cover. 4. Boil shrimp for about 5 minutes, or until opaque. Do not overcook. 5. Remove from heat, squeeze shrimp dry and place in a freezer bag or container to store. This keeps the shrimp fresh and allows them to marinate in the flavors of the marinade longer. Tip! You may cook the shrimp for 10 to 12 minutes depending on size and desired doneness. Carol Wyman Texas, USA Servings Serves 6 - 8 Preparation Put shrimp in a pan with marinade ingredients, over medium heat for about 5 minutes. Remove from heat. Squeeze shrimp dry and place in a bag to store. (Can be marinated for an hour or longer.)
