I have seen a number of ideas for making this happen but any input would be greatly appreciated. If anyone can offer any assistance with this, please let me know. A: There are options that will add a unique look to a Revit floor plan... though I've never seen one that looks exactly as you see in your image. Here is a link that takes you to a blog post that gives some suggestions: You might take a look at this too. It's a tutorial that shows how to add more unique characteristics to the floor plan. The perks, the gold and the insane levels of fame and fortune are just all-round addictive. And before I get my pen in it, let's not pretend these are the highest of highs. This election season has seen the downfall of Brazil's popularly elected president and it is not even over yet. The Brazilian economy is going through turbulent times and citizens are not even enjoying the electoral process as they were in the last two elections. It has been a particularly bad year for Brazil because the world has mostly ignored the country amid the election cycle. This uninterest has allowed it to take advantage of the few investors that remain interested in the country, thus prompting Brazil's stock market to hit a record high in early 2018. What's left of the "Bolsonaro Mistake" in Brazil? When former Brazilian president and president-elect Jair Bolsonaro says no one has been "mistaken" about him or the dire state of the economy, it refers to his opponents. Bolsonaro is one of the most ardent social conservatives in Latin America. He espouses a hard right-wing, militarized version of government that is buoyed by the region's conservative surge. But in his first year, many Brazilians have called him "Brazil's Donald Trump," and the new president has not managed to outrun the initial comparisons even though the country faces far worse problems than the American economy.
