What's new:

à©PC's NEW BATTLE SYSTEM FOR HORSES!!! MASSIVE HORSE ACTION FOR STRONG ARMED FIGHTER!? An action game with intense fighting on horseback of over 140mm in size! Multiplayer vs in real time! à©After years of vigorous research, we are pleased to announce our new battle system for horse armor! It's a completely original battle system, completely novel and original. It is a battle system for game characters within the 80mm diameter of a 200mm diameter spirit capsule.

à©The battle system itself is designed as a new skill in response to the tactical skill. The pride in its design lies in the sense of belonging to the battle situation. à©The area where our melee attacks are the focus is the 80mm diameter circular combat arena. The frontal direction is the main attack direction, and it can deploy a melee type attack. And at the same time, the oblique direction can deploy at will.

à©The area in the periphery has a maximum enemy evasion status, and it is a setting that presents enemy movements to us as being wrong. If we clear the peripheral area, the enemy can enter and be more challenging.

à©In the difficulty level fight, there are challenging aspects, but in the enmity level fight, enemy movement is almost unstoppable, and a general battle-ending ending must be dealt with at all costs. This is a fight for the overall survival of the characters.

à©Like this! In the choice of weapons, we have our own unique skills. Cut off their arms to take away their attack power? Deploy the above oblique direction so that their attack power drops to zero? We have it all covered in detail.

à©Equipping an armored horse gives you tremendous, mighty power in ground combat. It is enough to explain just the position of gravity and torque of our battle system. It makes even our master
